## EDUCATION

**MCA (Master of computer application)** 2020 – 2022
*Rajiv Gandhi University,Bhopal*

**BCA ( bachelor of computer application)** 2018 – 2020
*Barkatullah University,Bhopal*

## EXPERIENCE

**Full stack developer** 02/2025 – present
*Rittz Digital* ⊘ Chennai(remote),
India

**MERN Full Stack Internship** 02/2024 – 10/2024
*Cuvette tech* ⊘ Bangalore (Remote),
India

## PROJECTS

**Quiz Builder** ⊘
*Quizee Builder is a full-stack MERN application designed to make quiz creation and participation seamless. The platform allows users to build and share quizzes, while anonymous users can participate without needing to log in.*
**Frontend:** React, Raw/Vanilla CSS, Modular CSS
**Backend:** Node.js, Express.js, MongoDB
**Features:**
- **User Authentication:** Secure login and signup processes using JWT authentication, with encrypted password storage.
- **Quiz Creation:** Intuitive interface for creating and customizing quizzes, including adding questions and setting time limits.
- **Quiz Participation:** Users can take quizzes without logging in, ensuring ease of access.
- **Responsive Design:** The application is fully responsive, providing an optimal experience across devices.
- **Error Handling:** Robust error handling on both backend and frontend to ensure a smooth user experience.
- **Form Management:** Integrated with Formik for managing forms and Yup for validation.

**CodePlay Edtech MERN Application** ⊘
**CodePlay** is a cutting-edge Edtech platform built on the MERN stack, designed to provide an interactive and personalized learning experience for coding enthusiasts. The platform offers a wide range of courses, challenges, and learning resources to help users enhance their programming skills, from beginners to advanced levels.
**Frontend:** React,Tailwind CSS,
**Backend:** Node.js, Express.js, MongoDB
**Features:**
- **Course Management:** Comprehensive course creation and management system, allowing instructors to design and organize content effectively.
- **Responsive Design:** The platform is optimized for both desktop and mobile devices, ensuring a smooth user experience across different screen sizes.
- **Secure Authentication:** User data is protected with JWT authentication and encrypted password storage, providing a secure learning environment.

**story-web-app** ⊘
*A full-stack storytelling platform built using the MERN stack. The application allows users to create, share, and explore stories. It features a responsive design, JWT authentication, and secure backend API integration. The app utilizes Formik for form handling and React Toastify for notifications. It follows best coding practices with proper validation and error handling across both the backend and frontend.*
**features:**
- User Authentication and Story Creation & Management
- Story Sharing & Viewing
- Responsive Design & Form Handling,Error Handling
- Notifications

- Secure API Integration

## SKILLS

- Languages:   JavaScript, TypeScript, Node.js, C++
- Tools & Technologies :  React.js, Next JS, CSS,  Sass, Tailwind CSS,  GSAP, Express.JS, MongoDB, RESTful APIs, Redux ,Git, GitHub, vscode,postman
- Interest: web development,Problem solving,Data Structures and algorithms

## CERTIFICATES

- MERN Full Stack (Cuvette Tech)  🔗
- Front End Development  🔗
