Summary

Full Stack Developer (MERN) building toward AI-native development. Shipped a production AI assistant (Next.js + Groq API) integrated into my own portfolio, and a full-stack storytelling platform with JWT auth and validated APIs. Currently deepening LLM integration and agentic system skills through self-directed projects.

Education

Rajiv Gandhi University, Bhopal

Masters of Computer Applications

2020 – 2022

CGPA: 8.85/10

Barkatullah University, Bhopal

Bachelor of Computer Applications

2018 – 2020

CGPA: 6.85/10

Work Experience

Full Stack Developer | *Rittz Digital, Chennai (Remote)*

Feb 2025– Apr 2025

- Built and maintained frontend features using React, Next.js, and Tailwind CSS for internal business applications.
- Implemented GSAP-based animations and UI components to improve dashboard usability.
- Designed and implemented JWT authentication with Login/Signup functionality, secure password hashing (bcrypt), authorization middleware, and REST API protection.

MERN Developer Intern | *Cuvette tech, Bangalore (Remote)*

Feb 2024 – Oct 2024

- Built and shipped responsive full-stack web applications end-to-end using React, Express.js, and MongoDB.
- Designed and implemented REST APIs and database schemas for multi-user application features.
- Collaborated in a structured internship program (MERN Full Stack certification) covering the full development lifecycle from design to deployment.

Projects

AI-Powered Portfolio  | *Personal Portfolio with AI Assistant*

- Built and deployed a production AI assistant embedded in my personal portfolio (Next.js, TypeScript, Tailwind CSS), using the Groq API (Llama 3.3) to answer real-time questions about my skills, projects, and experience.
- Designed the conversational UX (chat interface, file-tab navigation: About/Projects/Skills/Contact) and handled prompt engineering to keep responses accurate and on-brand.
- Deployed live on Vercel — fully interactive, not a mockup.

Story App  | *A real-time story creating and sharing web app*

- Full-stack MERN platform for creating and sharing stories, with JWT authentication, Formik-based form handling, and React Toastify notifications.
- Implemented secure backend API integration with input validation and error handling across frontend and backend.
- Designed for multi-user content creation with persistent, structured data in MongoDB.

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP

Backend: Node.js, Express.js, MongoDB, SQL, REST APIs, JWT AI Integration: Groq API, Prompt Engineering, LLM-powered chat interfaces (shipped in production — see AI Portfolio Assistant project)

AI: OpenAI API, Groq API, Prompt Engineering, LLM Integration, AI Chatbot Development

Developer Tools: Git, GitHub, VS Code, Cursor, Vercel, Postman, Figma
