Education

Rajiv Gandhi University, Bhopal

Masters of Computer Applications

2020 – 2022

CGPA: 8.85/10

Barkatullah University, Bhopal

Bachelor of Computer Applications

2018 – 2020

CGPA: 6.85/10

Work Experience

Full Stack Developer | Rittz Digital, Chennai (Remote)

Feb 2025– Apr 2025

- Performed data analysis and built automated reports/dashboards to track KPIs, enabling senior stakeholders to make informed business decisions.
- Created visualizations and presentations of insights, improving operational transparency and accelerating decision cycles across departments.
- Supported management functions by coordinating cross-team activities, enhancing process efficiency and strategic planning.
- Exposure:** ReactJS, Tailwindcss, React Redux, NextJS, REST APIs, Gsap Animation, Data analysis, MS Excel

MERN Developer Intern | Cuvette tech, Bangalore (Remote)

Feb 2024 – Oct 2024

- Built responsive web apps, implemented APIs, and managed database structures.
- Exposure:** ReactJS, ExpressJS, MongoDB.

Projects

AI-Powered Portfolio | Personal Portfolio with AI Assistant

- Developed a responsive AI-powered personal portfolio using Next.js and Tailwind CSS with a modern, interactive user interface.
- Integrated the Groq API to build a conversational AI assistant capable of answering questions about my skills, projects, experience, and contact information.
- Designed a ChatGPT-like chat interface with reusable components, real-time AI responses, and dedicated sections for About, Skills, Projects, and Contact.
- Exposure:** Next.js, React.js, TypeScript, Tailwind CSS, Groq API, Prompt Engineering, REST APIs, Vercel

Story App | A real-time story creating and sharing web app

- A full-stack storytelling platform built using the MERN stack. The application allows users to create, share, and explore stories. It features a responsive design, JWT authentication, and secure backend API integration. The app utilizes Formik for form handling and React Toastify for notifications. It follows best coding practices with proper validation and error handling across both the backend and frontend.
- Exposure:** React, Node.js, Express, MongoDB, Formik, React Toastify

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP

Backend: Node.js, Express.js, MongoDB, SQL, REST APIs, JWT

AI: Google Gemini API, OpenAI API, Prompt Engineering, AI Chatbot Development, LLM Integration, AI API Integration, Agentic AI Fundamentals

Developer Tools: Git, GitHub, VS Code, Cursor, Vercel, Postman, Figma

Certification

MERN Full Stack - Cuvette tech
